

SUSTAINABILITY

Working today...for tomorrow.

The Hawk values are present throughout the Group and they reflect our commitment to sustainability. After over 40 years in business we have seen a lot of changes which is why we recognise that a focus on sustainability is more important than ever: for our business, our employees, the environment, our community and our customers.

How we approach sustainability

By working in partnership with the community we strive to achieve beneficial outcomes and community legacies that exist long after our project teams have moved on. We achieve this by delivering on our promise with integrity, honesty and sensitivity.

FOSTERING STRONG AND MEANINGFUL RELATIONSHIPS IS A CORE VALUE OF THE HAWK GROUP.

There is a lot of talk about sustainability throughout all industry sectors – but what does it actually mean? For the Hawk Group, sustainability is about working in a way today which enhances the world in which we work and live in for the future:

- **For our business**
- **For our employees**
- **For the environment**
- **For the community**

From our employees, to the way that we use technology, we take an all-encompassing view of sustainability, which is why it is a common theme of all the Hawk values and is a central consideration in the work that we do. We do not simply want to complete projects, but instead we want to leave a legacy of work which enriches local communities, boosts commerce and is something we can look back on with pride and a sense of achievement.
